What is the connection between chaos theory and fractals ... Fractals are repeating patterns, whereas chaos are non-repeating. So, though fractal theory is an essential part of chaos theory and has many applications in signal and image processing, basically it still failed in explaining the complexity faced in real world problems.

What is Chaos Theory? "Fractal Foundation Chaos is the science of surprises, of the nonlinear and the unpredictable. It teaches us to expect the unexpected. While most traditional science deals with supposedly predictable phenomena like gravity, electricity, or chemical reactions, Chaos Theory deals with nonlinear things that are effectively impossible to predict or control, like turbulence, weather, the stock market, our brain states.
